

The Federal Communications Commission

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

What is going to happen next! People do not have jobs and everyone wants more money for everything. Will you not be happy till we are all homeless, and no way to even exist. Maybe you will give immigrants phones at no cost like our government gives them everything and the people in this country have a hard time be able to even pay the necessities. When is all this crap going to end. If my phone bill goes up I will get rid of the phone completely and if more people will do this then you will make even less.

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

Sincerely,

Connie Wagle
